

I am a flight attendant with 28 years experience.

Docket 04-435 is opening a Pandora's box that is inconceivable. The .05% (educated guess) of businessmen that would gain from being able to be connected 24/7/35,000 ft that are lobbying for this should not be able to make hundreds of others lives miserable for their negligible (educated guess) gain.

Air travel in the 21st Century is difficult and exhausting. Lets not add more stress for those that choose to use flight time as a time to relax and reflect as well as well as increasing the potential circumstance for even more air-rage than we now deal with.

If this becomes law, I am afraid the Federal Government will have to hire mass quantities of Federal Air Marshals. Not to protect us from terrorists, rather from ourselves.

Thank you in advance for rejecting docket 04-435.
